

Serviced Office Space UK

115 Coventry Road

London E2 6GG

Surrounded by authentic railway arches and trendy East End bars and pubs, the space is ideally located for after work socialising. It lies only 250m from Bethnal Green tube station and only one stop to Liverpool Street via the Central Line, from which there are various mainline services further afield. Bus services offer even more transport links, and there are hotels in the area if any visitors require local accommodation. The ability to access Heathrow Airport with ease is another benefit of this location.

This building embraces its historical features which include lab tile floors, blue engineering brick columns and stunning water tower, now a two-storey office. Each studio retains a patch of the authentic brickwork combined with a pure-white colour scheme. It offers studios with city skyline views and fifth floor balconies. Stunning reception combining award winning café/restaurant and Club Workspace plus a communal roof terrace. Fully hosted Internet, telephony, support and cloud services are available here, so you are very well connected. The showers are very handy for those cycling to work, or for anyone enjoying a lunchtime run.
